

## Silo Mini Sconce

### Fluxwood

6-8 weeks

The rippled form and glass sphere casts a soft diffused glow, providing a gentle and glare free light source perfect for residential and commercial interiors. The Silo sconce's smooth undulating form is a contemporary design born from collaboration with Rainestone Ceramics. As a complimentary variation the design is explored here in a smaller timber body alongside the larger Silo Ceramic Wall Sconce.

### Specifications

---

Product Height 135 mm

Product Width 135 mm

Colour Temperature 3000K

Product Depth 110 mm

Made In Australia

### Features

---

Material : Hardwood, Glass

Available in Wall Plate Finish

Available in Timber Species

Colour Temperature : 2700K , 3000K

### Warranty

---

3 years

### Colours & Finishes

---

Colour(s) American Oak, Walnut, American Oak Black  
Finish, Black, White, Custom Powdercoat

Material Wood
