Made In China (assembled in Australia)

Track System Low Profile Track

Features

The Mekdrive 3 Compactus® delivers a market leading system width, which redefines non fixed-track Compactus® capability. It does not require fixing into the floor, eliminating any permanent damage & allowing for cost effective relocation & reconfiguration

The Mekdrive 3 has an optional longer pivoting ramp allowing the tracks to be levelled to a height of 100mm, catering for wider system widths and can be installed over varying floor contours.

There are a variety of locking options available providing additional security to stored documents.

Available in up to four shelving bays in widths with a maximum widths of 4800mm, offering a total block load capacity (limit) of 6,000kg, over five tracks.

The clip-on track ramps further reduce trip hazards increasing safety and allows for the movement of trolleys and wheelchairs between the shelving bays.

The Mekdrive3 track chain has a zinc plated finish providing a low maintenance solution with easy

tensioning that requires no lubrication, keeping a clean look.

The Mekdrive 3 Compactus® has multiple track configurations for better distribution of floor loads. The unique track anti-tilt mechanism secures all shelving, further enhancing operator safety. It has a narrower track at 105mm, which offers less protrusion

GECA Certified

The low profile track design, effectively lowers the overall height of the system to keep all storage levels within easy reach.

The Mekdrive 3 hand-wheel can be retro-fitted to Mekdrive 1 and 2 systems with a simple modification.

Dexion offers a 10 year warranty on this product.
