LEGLSS - STEEL FRAME

The engaging form of our original solid timber Legless stool released back in 2009, translated into a bent steel tube design suitable for use in residential, commercial and hospitality environments.

The evolution of the steel framed legless stool adds visual complexity through the appearance of a single tube bent in all directions to make up the frame.

Purpose designed brass connection details lift the timber seat above the thin cantilevered steel frame.

Made in Australia.

DESIGNER: Josh Carmody

YEAR OF DESIGN: 2016
