

Hot Stamping

ABOUT

Hot stamping or foil stamping is a printing method of relief printing in which coloured foils are transferred directly onto the plastic surface of the chair or stool at a high temperature. As a result, it's a highly durable method of printing school, business or community names and or logos directly onto the surface of our plastic chairs & stools. It also transforms the look of our chairs & stools, giving them that stylish and premium feel.

PROCESS

Printed locally in Australia, the process consists of a die being mounted in a hot stamping machine, the die is then heated with the chair to be stamped placed beneath it. The coloured foil is inserted between die and chair and the die is pressed down through it. The coloured foil used is then impressed into the backrest of the chair or stool.

STAMP COLOURS

NOTE: Single colour stamp only. Multiple colours not available
